PERSONAL PROJECTS

JANUARY 2023

SOCIAL APP, MONGODB, EXPRESS, REACT, BOOTSTRAP

A Full stack app build with the MERN stack where you can register, login, post, like, comment, search and follow other users.

[Live Site](#) [View Code](#)

DECEMBER 2022

WEATHER APP, REACT, CSS

A Front end app build with React where you can search the weather in any city. The app uses three external APIs, two geolocation APIs for mapping longitude and latitude to a city and vice versa, and one weather API for fetching the weather data according to the geolocation.
